c++ - Where is `%p` useful with printf? - Stack Overflow WEBMar 3, 2010 · Unfortunately it prepends '0X' not '0x', making the actual value hard to read. Presumably this is due to a missing '%P' variant. All told, this format specifier suffers from the problem of all 'platform dependent' implementations, that you can't really control what you're going to get. I use '0x%p' at the risk of getting a double 0x0X at the start. **database - How to show tables in PostgreSQL? - Stack Overflow** WEBApr 20, 2009 · You can use PostgreSQL's interactive terminal Psql to show tables in PostgreSQL. 1. NP stands for non-deterministic polynomial time. I know that / enables a switch, and I'm fairly sure that I know /a is for arithmetic. I've heard numerous rumours, some saying /p is for prompt, others stating it stands for print.
